

ARTICLE	PATCH FIT005 ELBOW
MANUFACTURER	D.Fenstec s.r.l.
TYPE OF PRODUCT	Analgesic patch with the ability to relieve the symptoms of pain, recovering the function that has suffered injury.
PRODUCT DESCRIPTION	The system basically consists of two elements: a non-woven polypropylene fabric and an acrylic adhesive. The colours used in the formula are enhanced with a certain percentage of titanium metal dioxides with different particles sizes called AT5.05: this powder reflects the far infrared waves emitted by the body - as shown by tests conducted by the Italian national research council (CNR).
CLINICAL SPECIFICATIONS	The patches promote pain relief. It is therefore clinically indicated for all cases where there is a need to eliminate toxins that have built up in the muscles: one of the causes of pain.
MATERIALS AND PROCESSING TECHNIQUES	The materials used in the device are: <ul style="list-style-type: none"> • 100% Polypropylene non-woven fabric • Acrylic adhesive mass • Ink colours • A mix of titanium dioxides of different grain sizes AT5.05 Sealed inside proper blister FIT personalized box
AVAILABLE SIZES	FIT005 Elbow – 12,7 x 11cm <ul style="list-style-type: none"> • Envelope 3 patches – 13 x 25cm • Envelope with hanghole 3 patches – 13 x 27,5cm
PATENT AND TRADEMARK	Product protected by industrial secret - FIT Trademark

PATCH FIT005 ELBOW

APPLICATION

Apply the patch(es) to the area experiencing pain: attach to dry, clean skin with no hair and massage for 2 minutes.

WARNINGS

The plasters are not to be used on wounds or on broken or reddened skin. If you suffer from specific blood circulation (especially to do with microcirculation) or muscular problems, seek the advice of your GP before applying the plasters.

CLINICAL CASE STUDIES AND FOLLOW-UP

Experimental trials and the relative publications, carried out on our device as well as on other devices based on the same principle, have shown that this phenomenon – although with a certain degree of subjectivity as subtle energy is involved – does, in actual fact, bring about benefits now acknowledged by various doctors during their clinical practices.

The key ingredient - as demonstrated by a number of tests carried out using thermal imaging cameras - can result in easier blood flow in the body's smallest vessels, which has the ability to soothe pain and consequently restore muscle function.

SPECIFIC INSTRUMENTATION

There is no instrumentation required for patient application.

DURATION

5 days, including showers and swimming pool

EXPIRY

5 years

BAR CODE

3 patches 8 051277 673055

CLASSIFICATION

Medical Device Class 1 according to Directive. 93/42/CEE

DATE OF LAST UPDATE

09/2019
